

Dale Street Reconstruction Update

[Español](#) | [Hmoob](#) | [Soomaali](#)

May 11: Work continues on bridge walls; temporary I-94 lane reductions

Construction this week will continue to focus primarily on the **Dale Street** bridge walls and center pier. There will be temporary lane reductions on I-94 at the construction area for the safety of workers and to make space for the concrete trucks and placement equipment; at least two lanes will remain open in each direction.

During the second half of the week – after work on the storm sewer is complete – grading will begin on the roadway on the east half of Dale Street between St. Anthony Avenue and University Avenue. Work will also continue on the small retaining wall between Carroll Avenue and Concordia Avenue on the east side of Dale Street.

Now hiring: Job opportunities still available

Contractors are still hiring for the Dale Street reconstruction project. Visit the resources below if you are interested in applying, and please share this information with others.
